### Thinking of Today – Planning for Tomorrow

Hausmann Industries is proud to offer a new series of Green-Line products – an environmentally safer alternative to traditional materials for improved air quality. Children are particularly susceptible to toxic environmental substances hence we have developed greener and safer medical tables and other products for these “vulnerable” patient populations.

- Green-Line wood has no added urea-formaldehyde and exceeds CARB I and II standards.
- All urethane fabric is CAL 01350 compliant.
- PVC-Free construction.
